**Subject:** Microsoft Settlement

It is time to put the Microsoft Anti-Trust matter to bed. The Justice Department and the Federal Government should spend their time and effort on more important and pressing matters. Matters of National Security and World Wide Freedom. The Federal Government and individual States have gone overboard in the harassment of Microsoft. States with selfish interest in protecting their home based companies used flawed reasoning to pursue litigation against Microsoft. Our Federal Government with political bias campaigned against one of the companies that helps to continue our legacy as the home of the free with freedom to innovate. Bill Gates is an American patriot and has fostered freedom to innovate. His competitors wants to use politics to accomplish in the courtroom what they can't achieve in the market place.

Settle the matter. Get on with the more important business of protecting our nation from terrorism.
